

Project Description

Becher Hoppe was selected by the Wisconsin Department of Transportation (WisDOT) to serve as the Utility Coordinator for the USH 41 projects in Winnebago and Brown Counties. Becher Hoppe's Utility Coordination Team serves as a liaison between the 38 unique utility operators, WisDOT, and over 20 design consultants to mitigate potential conflicts between roadway improvements and utilities.

Project Features

- \$1.515 billion "Mega Major" project added lanes along 31 miles of USH 41
- Upgraded and rebuilt interchanges throughout the USH 41 Corridor
- 120 construction projects
- Total of 40 new roundabouts at ramp terminals, frontage roads, and local intersections

Firm's Involvement

- Early coordination with individual utilities for complex relocations and long material lead times
- Reviewed transportation project plats and right of way plats
- Monthly utility coordination meetings for each of three segments in Brown County
- Tracked conveyance and compensation agreements
- Reviewed and approved each utility work plan
- Created utility status report for each construction project
- Developed utilities articles for special provisions of each construction project
- Coordinated schedules and traffic control for utility relocations
- Developed and maintained utility log
- Monitored compliance with Trans 220
